HON HAI CORPORATION INTRODUCTION

Hon Hai Precision Industry Co., Ltd. (trading as Foxconn) was founded in 1974 as a manufacturer of electrical components. Foxconn’s primarily products are electronics equipments such as PC motherboards/modules, phones, and cable connectors. Its long term customers include major American, European and Japanese electronics and information technology companies. Today, Foxconn is the world's largest maker of electronic components.

Foxconn has factories in Asia, Europe and Latin America, which together assemble around 40 percent of consumer electronics products in the world. With over 1,500,000 employees worldwide, Foxconn Technology Group has operations strategically situated across Americas, Europe and Asia.

Since 2007, Foxconn established two mega-sites in Bac Ninh and Bac Giang province. Up to date, Hon Hai’s Vietnam production facilities have the potential of becoming the Taiwanese group’s largest manufacturing sites.

Hon Hai’s commitment to continual education, investing in its people long term and localization globally not only leads to the deep collaborating relationships with leading institutions of high learning, and also allows it to be the only company consistently ranked among top ten in the Business Week IT100 since 2002 and Fortune Global 500.

To fulfill the requirement of fast expanding business in Vietnam, we are recruiting professional staff and engineers who are Vietnamese and achieved education from Taiwan. Qualified candidates will work in one of our factories which located in Bac Giang and Bac Ninh provinces. If you find yourself match with any position which is described in the enclosed list, please feel free to send us your information (detail CV, degree if available, and transcript) to this email carl.chan@foxconn.com. If you need further information, please do not hesitate to contact us as well. Thank you.
